DETAILED ACTION

1. It is hereby acknowledged that the following papers have been received and placed of record in the file: Amendment A (dated 9/14/2005)
2. Claims 5 and 9-19 are presented for examination.

Allowable Subject Matter

Claims 5 and 9-19 are allowed.

The following is an examiner's statement of reasons for allowance: There is no prior art of record that teaches or renders obvious to one of ordinary skill in the art a quarter wave plate comprising a twisted nematic-liquid crystal polymeric film sandwiched between a first and second uniaxial polymeric film to form a quarter waveplate device with broadband spectrum. Broadband spectrum is interpreted in the art as well as applicant's specification as a range of 400-700 nm. Yoon in the article "Nontwisted quarter-wave liquid crystal cell for high contrast display" teaches a non-twist (ie not twisted nematic) quarter wave liquid crystal layer in combination with a half-wave plate to form a broadband quarter wave plate. Yoon also shows combination of a twisted nematic liquid crystal cell with a wideband quarter waveplate but indicates that a wideband quarter wave film is costly. The invention does not rely on a single wideband quarter wave film but two uniaxial films arranged with a polymeric TN-cell between to form a wideband quarter wave film. Zhu in a prior application teaches another combination of a half-wave film and a twisted nematic LC polymeric film to form a broadband quarter wave plate (US 6922221), however applicant's provisional

application excludes this as prior art. In addition this reference does not disclose using two uniaxial films in combination with a TN-LC polymeric film to form a quarter wave film.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
